DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is confusing what comprises the invention. The claim defines a handle, but the body of the claim positively recites structural elements of a luggage (the arm portion being spaced from and external of the piece of luggage). Is the invention a handle or a luggage/handle combination? Applicant is required to state whether a subcombination or a combination is intended, and amend the claim to clarify the matter.

It is unclear what is meant by "so limiting".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 5, and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Gallagher (6317924). Gallagher teaches a towing member with an arm portion, a pivot mechanism

connecting to the towing handle by portion 44, a locking mechanism by the engagement of portions 58 and 54.

5. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Lu (6508344). Lu teaches a towing member with an arm portion, a pivot mechanism connecting to the towing handle by portion, and a locking mechanism having a release button 37.

6. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Lu (6530459). Lu teaches a towing member with an arm portion, a pivot mechanism connecting to the towing handle by portion, and a locking mechanism having a release button 41.

Regarding claim 6, the lower portion of the handle in Lu is T-shaped with a stem at portion 324.

7. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen (6332242). Chen teaches a handle, arm portions 63, pivot mechanism 64, a locking mechanism operate via the button 20.
